WELCOME

Our brand philosophy:

Sweden is a country fortunate enough to have deep forests, clean water and an abundance of fresh air. We take the environment seriously and most Swedes have a close relationship to nature.

As a company, we want to do our part in taking responsibility for the planet and the people living in it. The raw material we use is either recycled or recyclable. We are careful to make sure we control each step of the production to be as sustainable as we can.

The human aspect is just as important. We choose small factories that we can develop a close relationship with, whether it's in Sweden or in Asia.

Sweden, as well as the rest of Scandinavia have a strong design oriented legacy. You could say that it's in our DNA.

Most Swedes have a relation to our iconic designers, growing up in homes where functional design was as natural as meatballs and potatoes for dinner.

Our wish is to continue following the path that our former generation of designers have paved the way for. We want to design beautiful and practical items in a Scandinavian style, using long lasting materials and never hold back on quality. It is not our intention to produce things for a season but for LIFE!

Our goal is to produce items you can grow old with, things that will make you smile and bring a little bit of Scandinavia in to every home.

THE KITCHEN

Considering how much time we spend in the kitchen, it is definitely one of the most important places in our homes. We believe that if we surround ourselves with nice looking, practical items it makes cooking much more fun.

When we develop new products, we look into different aspects of the item and for it to make its way into our range, we want it to be:

- *Functional
- *Serve a purpose
- *Nicely designed
- *Consciously produced

LEAF - SALAD SET

Design: Johannes Lindner

A nice salad set is the little extra that lifts any dinner to visual heights. (You will have to manage the taste on your own...) DOTS & CIRCLE - TRIVETS

Design: Veronica Vejsholt

Cork is an amazing material! Insulating, heat resistant and besides that it does not burn.

All our cork items are produced at a small family factory in Portugal with great care for the environment and their heritage.

The cork trees are cared for with great love and the bark is harvested approximately every 9 years, which makes it a very slow way of farming. We use RECYCLED cork which saves the planets resources so that we can use this wonderful material with good climate conscience!

HEX WINERACK

Design: Matz Borgström

Hex Winerack is not only a storage for bottles, it is a piece of art all by itself. The modules slide into each other one by one, which means you can build your winerack into various shapes in your own personal style.

The winerack is made of extruded aluminum and you can choose if you want color on the outside or plain aluminum. With our super smart mounting plates you have the opportunity to hang it under a shelf or a cupboard. Otherwise it looks just as nice standing freely or against a wall.

THE GARDEN

Swedish summers are short but lovely. We spend as much time as possible outdoors the light months of the year and naturally the garden or the balcony are important places.

The interest in gardening and growing your own vegetables has never been bigger and is attracting more and more people. It doesn't matter if you have a large ground or only a few pots on your balcony, the joy and fulfillment of putting your fingers in the soil is instantly there.

At Born in Sweden we are constantly looking at new products for planting and gardening - like all our items, with an extra touch of style and design.

GARDEN WATERING CAN

Design: Pascal Charmolu

The garden watering can contains 7,5 liters and has a smart handle underneath which makes it easy to manage. Use the pouring function on one side, or tilt it around for the shower function. Whenever it is not in use, it stands like a cool sculpture.

FLYSWATTERS

Design: Pascal Charmolu

Along with the lovely summer days, comes the maybe not so welcome flies and mosquitos. A flyswatter is then a very handy tool for both indoor and outdoor use. We call ours "Wings", since it is designed to look like a fly with its two wings. This makes it cool enough to have it standing nearby at all times ready to grab and smack. Besides, this is a gift that you can be sure everybody needs.

FUEGO - OUTDOOR FIREBOX

Design: Johannes Lindner

The campfire has been a gathering place for mankind since the beginning of time. And now the pandemic has made us socialize and spend a lot more time outdoors- all year around. Our fire box is a modern style camp fire aswell as a BBQ, a piece of modern warming design.

It is made of Corten steel which is a sustainable and maintenance free material that will-- slowly change color from black to a rust red. The color changes through oxidation and creates an enduring surface that protects the steel underneath.

Along with each fire box comes a stainless steel grid for BBQ-ing, a stainless steel grid for the fire box and two wooden protection rails.

VASES FOR STUMPASTAKEN

Design: Jonas Torstensson

What is a vase?

What is a candleholder supposed to look like?

With the Stumpastaken range we want to widen the concept a bit and instead start thinking in terms of what a decoration object is.

A Stumpastake filled with mini vases like on the photo, gives the impression of an indoor meadow.

Extra special during the time of year that there are no flowers outdoors.

Easily change your decoration piece to a candleholder or a snacks tray, the limit is only your imagination.

STUMPASTAKEN

Stumpastaken was designed already in 1991, by Swedish designer Jonas Torstensson. He realized how many end pieces of candles we throw away and wanted to create something to reduce the waste. With Stumpastaken you can save all candle stumps, place them in this cool looking candle holder and safely burn them all the way down.

Since 1991, the Stumpastaken family has grown with various sizes of the candle holder, as well as a number of accessories and it has become a Swedish design classic.

Stumpastaken is made in Sweden from 100% recycled aluminum.

RUGS

Design: Veronica Vejsholt

Sweden has a long tradition of weaving. In the old days, almost every home had their own loom, using old rags from worn out clothes and home textiles to make rugs in beautiful patterns and colors. We appreciate this tradition, and with our collection of high quality wool rugs woven on a linen warp, we flirt with our heritage and bring it into the modern home. The rugs are soft to walk on even with bare feet and are heavy enough to lie stady on the floor.

CANDLEHOLDERS

More candleholders? Yes of course!

Most months of the year the evenings are dark. Even in summertime its nice to have a little extra candlelight, both on the dinner table or as a cozy mood enhancer. A flickering candle really gives you an extra dimesion of peace and calm. So yes... here are some more candleholders!

PUZZLE CANDLEHOLDER

Design: Jonas Torstensson

Due to their shape, Puzzle candleholders are possible to place in many different ways. Combine them as you like for your own personal candelabra. Along with every piece comes an optional rubber ring to stop the candle wax from dripping.

Puzzle candleholders can be purchased as singles, in a two-pack or three-pack. They are also the perfect match with Sphere vases.

NIGHTLIGHT

Design: Edmire

Nightlight is a candleholder with a simple aesthetic beauty, inspired by the times before electricity. In those days you would have to bring a candle to the bedroom and place it on the bedside table, hence the name - Nightlight. Even if that is no longer necessary, candlelight still has the same calming effect.

CHRISTMAS TREE HOLDER

Design: Pascal Charmolu

The Christmas tree holder is a steady piece that holds even really big trees. It is made of recycled aluminum and has either a polished or powder coated finish. Pascal Charmolu designed it already in 2008 and it has since then become a loved and appreciated Born in Sweden classic.

OUR STORY

Born in Sweden was founded in 2008 by Kim Vejsholt. He was previously the founder and co-owner of Sagaform. After making Sagaform a success story, he and his partner sold the company in 2001.

Kim then had the vision of creating a new company, a design company where each product would be allowed to take longer time in the development phase, with products aiming at a higher end of the market.

So, after a few years, Born in Sweden's first items were launched.

In the beginning all items were designed by Pascal Charmolu, a french designer who's been living in Sweden for many years. For example, he is the designer behind our popular Birdfeeder and Sphere Vases.

Now, we have a lot of exciting collaborations with talented designers and the design process is long and complex. A new product has to fit into Born in Sweden's philosophy and range and also have to be either recycled or recyclable.

Born in Sweden's office and warehouse are located in Borås which is a 30 minute drive east of Gothenburg. However, a lot of inspiration, both for new products and marketing comes from the west coast of Sweden and it's landscape Bohuslän. On the island of Tjörn, we have an extra office and this is where we shoot most of our photographic material.
